Ankle Brace L1906

Ankle Brace provides ankle stability to weak or injured ankles. Ideal for treatment of slight to moderate ankle sprains, strains, and ankle instability or weakness. Makes a great preventative brace during activity to help reduce the chance of sprains or strains.

- Bilateral Articulating Hinges glide smoothly and allow for full, unrestricted foot flexion. An Articulating
- Hinge Design is preferred by physical therapists and athletic trainers to prevent ankle injury and promote healing.
- Foot Plate transfers weight-bearing forces from the ankle joint and increases foot and ankle stability.
- Allows for Full, Unrestricted Foot Flexion.
- Solid U-Shape provides superior inversion/eversion protection.
- Lightweight Support Shells are molded from a lightweight plastic material in a design tailored to the ankle for maximum stabilization of the joint.
- Padded, Formed Foam Liners Ultra-lightweight liners cushion and hug the ankle with less bulk for a sleek, low profile fit.
- Integrated Elastic Straps Two closure straps are integrated for a secure fit with no movement.

ITEM DESCRIPTION: Ankle foot orthosis, multiligamentous ankle support, prefabricated, Includes fitting and adjustment

ICD-9 Codes:

<input type="checkbox"/> 718.47 Contracture of joint, ankle and foot	<input type="checkbox"/> 728.89 Other disorders of muscle, ligament & fascia	<input type="checkbox"/> 845.00 Sprain & strain of ankle & foot, unspecified site
